

Using MathMedia TESTS

TO: Instructors, Teachers, and self-learners

Here are some ideas for using the enclosed TEST(s):

- (1) Use the Test as a PRE-TEST to find areas of weakness. The top left corner of each problem indicates which section in the program to study for that question.
- (2) Use the Test as a PRE-TEST to compare with the score obtained after going through the whole program.
- (3) Use the TEST as a traditional POST-TEST to determine proficiency in the subject. Print test and score sheet to analyze weak areas, which require further study.
- (4) Perform the TEST at the computer or on paper -- score the test at the computer or score "by hand" with the enclosed answer sheet(s).
