Requirement Designation: Meets IGETC 3B CSU C2

Enrollment Requirement: Prerequisite ENGLISH 101 or ENGLISH 101Z or E.S.L. 110

This course encourages students to read literature from the perspective of filmmakers whose intent is to adapt it for the screen, as well as filmmakers who have an artistic vision or a story to explore as an original screenplay. By so doing, students hone their close reading skills on written and cinematic

texts. They compare and contrast the elements of literature in both genres; including theme (ideology), story (plot), narration (narratology), point of view, characterization, dialogue, setting, scene descriptions (mise en scene, imagery, symbolism, tone) and editing. The first half of the course focuses on literature 'and' film, the second on film 'as' literature.

LIB SCI 101-College Research Skills (UC/CSU) - 1 Unit

This is a practical course in college level research using academic libraries and related information sources. Students develop strategies to find, organize, evaluate, and cite various print and online sources effectively and ethically. These skills help students become strong researchers and life-long learners.

Management

MGMT 002-Organization And Management Theory (UC/CSU) - 3 Units

Students will be introduced to the management and organization of businesses. Students will connect how the management of people and resources accomplishes organizational goals. Students will demonstrate their understanding of leading, planning and controlling, organization design, operations management, and decision making. Students will also provide examples of human resource management, managing change, individual and group behavior, motivating and rewarding employees, communicating and interpersonal skills, work teams, ethics, leadership and trust in various business case studies.

MATH 229-Statistics for Data Science (UC/CSU) - 4 Units

Requirement Designation: Meets CSU B4

This course examines fundamental concepts that are the building blocks for data science work, include gathering and summarizing data (descriptive statistics) and relationships between variables, probability techniques, and distributions such as conditional probability and Bayes Theorem, and hypothesis testing to facilitate decision-making (inferential statistics). This course will analyze the pros and cons in decision theory through the exploration of sampling and control limits. Students will study correlation and regression analyses such as linear models for data science and multivariate regression and the application of technology for statistical analysis including the interpretation of the relevance of the statistical findings to data science. The course will examine applications using data from disciplines including engineering, business, natural and social sciences, and psychology. There will be a hands-on approach to statistical analysis using the tools (statistical software) of choice, such as Python and R.
